

W 8 L STONE HARDENER

Cement Floor Hardener, reduce dusting, Efflorescence

Uses:

1. Concrete floor hardening, to improve wear resistant.
2. Acid Proof, to harden and increase acid resistance for concrete.
3. Dust Proofing, reduce dusting due to the micro-pitting causes by the soft Calcium hydroxide.
4. Flame Retardant, Prevent spreading of flame

Features:

1. A low viscosity liquid chemical. It reacts with the soft free Calcium Hydroxide in the cement, converting it into a very hard and strong crystal, increase surface wear resistance by 2.5 times.
2. It will harden the floor surface and dust proofs it at the same time.
3. The Crystal formed will also block the passage of water, reducing efflorescence.

Use W8P as needed to prevent water seeping.

W8P WATER BLOCK + Water = 1 + 10 Spread over the W8L wetted roof.

Application Methods:

1. To be applied to cement surface 7 days after placement.

Dilute W 8 L Liquid + Water = 1 + 20 parts by volume

Coverage: 30 to 40 m² per kg

2. Spread it over the cement floor, allow 30 minutes or more for the solution to seep into the concrete.
3. Upon drying, spray water over the next 30 minutes to let the chemicals seep in deeper into the cement.

Technical Data:

pH: 8 Highly alkaline

Colour: Clear Liquid.

Packing: 1 kg-bottle, 5 kg-carboy, 20 kg-plastic can

Health and Safety:

1. Avoid contact with eye or skin. Wear goggle, rubber glove and protective gears during work.
2. Avoid prolong contact, in case of contact, rinse with large amount of water for 15 minutes.
3. Non-hazardous, non-toxic and non-flammable.
