

W8L CONHARD CONCRETE HARDENER

CEMENT FLOOR HARDENER THAT REDUCES DUSTING AND EFFLORESCENCE

USES

1. Improves wear resistance
2. Hardens and increases acid resistance for concrete
3. Reduces dusting due to micro-pitting caused by soft calcium hydroxide
4. Prevents spreading of fire; flame retardant

FEATURES

1. A low-viscosity liquid chemical; reacts with the soft free calcium hydroxide in the cement, converting it into a very hard and strong crystal and increasing surface wear resistance by 2.5 times.
2. The crystal formed will also block the passage of water, reducing efflorescence.
3. Hardens and dust-proofs the floor surface.
4. Use W8P as needed to prevent water seeping.

W8P WATER BLOCK + Water = 1 + 10

Spread over the W8L wetted roof.

APPLICATION METHOD

1. Apply to cement surface 7 days after placement.
2. Dilute W8L Liquid + Water = 1 + 20 parts by volume
3. Coverage: 30 to 40 m² per kg
4. Spread it over the cement floor. Allow 30 minutes or more for the solution to seep into the concrete.
5. Upon drying, wet the surface with water again to let the solution seep in deeper into the concrete.

TECHNICAL DATA

- pH: 8 Highly alkaline
- Colour: Clear liquid

PACKING

1 kg 5 kg 20 kg

SAFETY PRECAUTIONS

1. Avoid contact with eyes or skin. Wear goggles, rubber gloves and protective gear during work.
2. In case of prolonged contact, rinse with large amount of water for 15 minutes.
3. Non-hazardous, non-toxic and non-flammable.
